## Preface

As far as you know, IELTS candidates will have only 30 minutes in PBT, extra 10 minutes for transferring the answers to the answer sheet for the IELTS Listening test. There will be a total of 40 questions. Therefore, it is absolutely necessary that you invest time in practicing the real IELTS Listening tests for this module.

Besides the Cambridge IELTS Practice Tests series published by Oxford University Press, IELTS Listening Recent Actual Tests with Answers aims to develop both test-taking skills and language proficiency to help you achieve a high IELTS Listening score. It contains IELTS Listening Tests in the chronological order starting from the recent tests and an Answer Key. Each test contains three Listening passages which cover a rich variety of topics and give a lot of practice for a wide range of question types used in the IELTS Exam such as multiple-choice questions, short-answer questions, sentence completion, summary completion, classification, matching lists, phrases, matching paragraph headings, identification of information – True/False/Not Given, etc. When studying IELTS with this e-book, you can evaluate at the nearest possibility how difficult the IELTS Listening Section is in the real exam, and what the top most common traps are. Moreover, these tests are extracted from authentic IELTS bank sources; therefore, you are in all probability to take these tests in your real examinations.

The authors are convinced that you will find IELTS Listening Recent Actual Tests extremely helpful on your path to success with the International English Language Testing System. Don't just trust luck in your IELTS exam – the key is practice!

## Introduction to IELTS Listening

The IELTS listening test is the same for both those taking the Academic and General Training papers. There are four parts in the listening test. Each part has 10 questions, making a total of 40 questions. The parts become progressively harder. The answers to the questions come in the same order as the information on the recording. The whole test lasts about 30 minutes, including the instructions, your reading and listening time, and the time allowed for transferring your answers from the questions paper to an answer sheet.

### How are IELTS Listening answers scored?

A human examiner marks your answers. You get one point for each correct answer, giving you a 'raw score' out of 40. This is converted into a 'band score' from 0 to 9. For example, you need 30 correct answers to get a band score of 7.0. Even though IELTS test materials are trialed and pre-tested before being used in actual tests, there are variations in the tests' varying degrees of difficulty.

In order to combine results from several test versions, the band score limits are defined. This ensures that all test takers' outcomes are related to the same achievement scale. In plain language, this indicates that the limit for Band 6, for instance, may be set at various raw score thresholds throughout multiple versions.

Band Score Threshold	Basic Score Out of 40
8	35
7	30
6	23
5	16

## Study Guide

Here are three techniques that you can follow during your attempt for the IELTS listening test.

[www.zandienglish.ir](http://www.zandienglish.ir)

## Characteristics of Good Listening

Band	Description
9	Has fully operational command of the language: appropriate, accurate and fluent with complete understanding.
8	Has fully operational command of the language with only occasional unsystematic inaccuracies and inappropriacies. Misunderstandings may occur in unfamiliar situations. Handles complex detailed argumentation well.
7	Has operational command of the language, though with occasional inaccuracies, inappropriacies and misunderstandings in some situations. Generally handles complex language well and understands detailed reasoning.
6	Has generally effective command of the language despite some inaccuracies, inappropriacies and misunderstandings. Can use and understand fairly complex language, particularly in familiar situations.

## Tips and Tricks for different question types

Let's look at the tips and tricks required to answer each question type:

### Multiple Choice Questions

While listening to the audio recording there will be a section for multiple-choice questions. The multiple-choice questions are of two types –

- Multiple choice questions with one answer.
- Multiple choice question with two or more answers

There are questions that have one or more answers, for those types of questions, you would have to listen keenly to identify all the answers from the options given.

There are a few things you would have to keep in mind while you're answering multiple-choice questions:

- You will hear all the options that are given to you in the question. You would have to listen to the audio and interpret the answer from what is asked in the question.
- Sometimes, the answer options might be of the same kind to confuse you. For instance, it might all be in the form of dates 15 November, 17 November or 18 November. You would have to read the question and choose the correct answer.
- The words used in the question might not be the exact words that you hear in the audio recording. So, you'd have to pay attention to synonyms and how the words are paraphrased.
- The information provided in the audio recording might not be in the same order as the questions asked, so in order to answer the questions correctly, you should have read the questions beforehand to be aware of what is being asked.
- There would be a lot of distractors in the audio recording. There would be a lot of the same kind of information. Sometimes, the speaker might give us any information and then change it, which might be the correct answer. So, do not rush and write down the answer as soon as you hear it.

## Map/ Plan/ Diagram Labeling questions

For these types of questions, you would be provided with a map and you would have to label the places on the map.

There are two types of questions:

1. A list of words might be given to you and you'd have to listen to the recording and choose the correct word that fits the blank on the map.
2. There won't be a list, you would just listen to the audio and identify the place on the map.

There are a few things you would have to keep in mind while you're answering Map Labeling questions:

- There would be directions to a place or some kind of tour.
- Read the instructions before you begin, so that you'll know the word limit of the blanks.
- Description of the location – listen to words that best describe the location given. For example, below the park, next to the supermarket, etc.
- Look at the question numbers – Look at the question numbers and identify the flow of the map. That would help you listen to what's coming next.
- The audio recording would provide you with an understanding of where you are or where you have to begin. Pay attention to it at the beginning of the recording. Also, listen to nearby places and clues to help find the answers.

## Sentence/Summary Completion/ Note completion/ Table completion/ Diagram completion questions

In some of the questions, there will be a gap left in between and the examiner asks you to fill that gap. In order to guess the word correctly, you must have solid grammar skills.

There are a few things you would have to keep in mind while you're answering sentence and other completion questions:

- Read the question before you start in order to understand what you should be listening for.
- Try to guess what would come in the blank. It could be a place, a number, year, name or even a specific range of information such as seasons, climatic conditions
- The words in the question need not necessarily be the same words you hear in the audio recordings, learn to tune yourself to synonyms of the words in the question.
- Though the questions might be phrased differently from the recordings, the answers should be the exact words you hear in the audio.
- Remember to check the word count, spelling and grammar before you transfer your answers to the answer sheet.

## Matching Questions

These questions are not as common as the other question types but they do occur in the Listening section. These questions have a list of statements that you'd have to match with the options provided. Mostly it would be names, places or dates.

There are a few things you would have to keep in mind while you're answering Match questions:

- Look at the statements and listen keenly to the kind of information that has been provided as options. i.e if the options are dates, listen keenly to all the dates in the audio.
- By the way, write down all the information linked to that particular option, it would make it easier for you to find the answer.

## Short Answer Questions

The Short answer questions require candidates to read a question and write a short answer using the information from the audio. In this question type, commonly, distractors are used. A distractor is something that appears when you get wrong information. Thus, you must listen to the recording carefully and give correct answers.

There are a few strategies that have to be borne in mind while answering these types of questions. They are listed below:

- Before you listen to the given prompt, take your time to read the question and possible answers given in the options to understand the keywords and the topic.
- Once done, underline all of the keywords. Generally, avoid underlining basic adjectives, pronouns and adverbs.
- Pay special attention to question words. These will help you find answers easily.
- Now, you can begin listening. As you listen, write out all of the information so that you will remember it afterward.
- Make sure your answer is accurate.

## What is a signposting language?

Signposting means using phrases and words to guide the reader through the content of a passage or a recording. In this case, it's an audio recording. With the help of these phrases and words, the listener can anticipate what's next and find the answer.

### Signposting Examples:

Purpose	Signposting language
